

Sahil Mushtaq

bhat71043@gmail.com

Summary

I build modern web applications—and actively try to break them. Bridging full-stack development (Python, JavaScript) with hands-on cybersecurity (Kali Linux, Wireshark), I engineer scalable, optimized code that is secure from the ground up

Education

Indira Gandhi National Open University (IGNOU),
Srinagar | Jan 2024 – Present

- Bachelor of Computer Applications (BCA) — Currently in 3rd Semester.
- Selected as an official Student Partner for the IGNOU Srinagar Regional Centre to represent the university program

Skills

- Security
- Development
- Architecture
- Digital

Language

- English
- Hindi

Experience

Freelance Developer & SEO Specialist, | Jan 2023 – Present

- Architected and deployed responsive digital portfolios for clients, optimizing codebase for speed and zero-layout shift.
- Engineered technical SEO strategies that directly improved search engine rankings and online visibility for client projects.
- Produced high-converting promotional video content, utilizing advanced editing software and Lightroom for professional color grading.
- Mentored students in core computer science fundamentals, programming logic, and digital literacy.

PROJECTS

The Daily Chronicle | Full-Stack Portfolio

- Developed a secure, fully responsive developer portfolio featuring glassmorphism UI, scroll-reveal animations, and Formspree API email integration.

Automated Telegram Bot | Python

- Engineered a Python-powered bot utilizing the Telegram API to automate task execution, fetch real-time data, and schedule message delivery.

Parking Management App | Python & SQL

- Conceptualized a full-stack application architecture for real-time parking slot tracking, automated booking workflows, and dynamic billing calculation.
